My freedom.

TISCHER
FREIZEITFAHRZEUGE

*Pick-up Cabins
2026 EN*

*On the same wavelength
as you: comfort, service
and flexibility.*

Tischer: pure Pick-up Power.

Freedom on four wheels – flexible and comfortable.

Born in America, refined in Europe: the pick-up has been inspiring free spirits around the world since the golden 1920s. No wonder: hardly any other vehicle is as versatile as the pick-up truck. Driving, loading, experiencing – everything is possible. This is how we came up with the idea of transforming the pick-up truck into a mobile home.

For over 50 years, Tischer has been your specialist for manufactured-quality cabins. Combined with a powerful pick-up truck, our cabins are your personal way to freedom. Ideal for spontaneous weekend trips or long voyages of discovery. No matter what you need for comfortable travel: everything is on board.

Summer or winter? City or off-road? Adventure or everyday life? Wherever your journey takes you, your pick-up truck with a Tischer demountable cabin gives you complete freedom to travel flexibly and independently. And if you “only” need the pick-up truck, simply remove the cabin and drive off. It couldn't be easier.

My Tischer.
My moment.

Idea & Production

Flexible travel: with the best comfort and top service.

Mounting and Demounting

It's easy with every Tischer pick-up cabin.

Mounting & demounting in just
20 minutes

The cabin can be easily raised and lowered using the extendable supports. Thanks to the professional instruction provided by our specialist staff when the vehicle is handed over and with a little practice, raising and lowering can be done in around 20 minutes.

Watch the video

Extend supports with cordless screwdriver or crank handle

Turnbuckle and 13-pin socket

Demounting

For demounting, you just have to release the attachments between cabin and pick-up and drop the four supports to the ground. The supports are extended with the help of a crank or cordless screwdriver until the cabin is separated from the vehicle. Once you have driven the vehicle away, you lower the cabin slightly to facilitate easy entry.

Mounting

Mounting the cabin is just as easy, just in the reverse order: Lift the cabin until you can drive the pick-up beneath it. Now lower the cabin again, attach the brackets, plug in the 13-pin plug for the lighting as well as the 3-pin plug for charging the battery and retract the supports.

Smart construction

Every Tischer cabin is designed to ensure that the truck bed need not be altered; it can be used without restriction following demounting.

Pick-up Cabins

Trail or Box: choose your favorite!

When it comes to pick-up cabins, do you prefer the classic shape of our Box version? Or is our somewhat sleeker Trail model more your thing?

Both are very positively rated by Tischer customers. Here we briefly show you how they differ from one another:

The modern looking **Trail version** is more streamlined at the alcove above the pick-up's passenger compartment. This improves the aerodynamics and provides more space inside. The material used is double-shell foam-filled GRP molded parts. The flat surface at the front is ideal for installing a pair of additional headlights if you want.

Due to its slightly more angular appearance, the **Box version** looks bigger. In terms of material and manufacturing quality, it is in no way inferior to the Trail model. It is also built from high-quality aluminum sandwich panels. However, the production process is less complex. That is why we can offer this model cheaper.

Trail version

Box version

Production

Cabin construction: modern technology and traditional craftsmanship.

***From the initial design to the finished Tischer cabin:
everything is perfectly customized for you.***

Our employees use state-of-the-art machines and a high level of craftsmanship to produce high-quality cabins "Made in Germany".

The result is cabins of the highest quality. Your mobile home can last for many years with minimal maintenance. And this durability is not only good for you, but also for the environment.

The cabins are constructed using a sandwich design. Aluminum sheet, rigid foam, and the inner plywood panel are bonded under pressure. The CNC-milled cabin components are then precisely assembled. This construction method has several advantages: high stability, low weight, and excellent insulation properties.

My playground.

Tischer Pick-up Cabins

Experience boundless freedom: with pick-up cabins from Tischer.

Trail / Box 200

Suitable basic vehicles:**

Ford Ranger | Isuzu D-Max | Jeep Gladiator | Land Rover Defender | Mercedes X-Class | Mitsubishi L200/Fiat Fullback | Nissan Navara | Toyota Hilux | VW Amarok

Compact, light and spacious – with these features, the demountable cabin Trail/Box 200 is the ideal travel companion for couples taking active holidays.

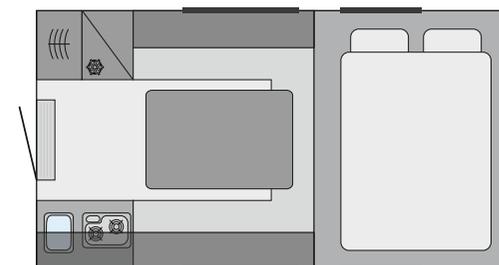

The Trail/Box 200 model is suitable for both One-and-a-half cabin and Double cabin pick-ups. In combination with a One-and-a half cabin, the demountable cabin is almost flush with the back of the basic vehicle. This means the slope angle of the pick-up is not restricted and the special construction technique of our most popular and lightest cabin means that good cross-country mobility is assured.

In the interior, numerous comfort features immediately become evident: a standing height of 1.95 m, a central seating group which can be converted to a bed area and the generous bed dimensions prevent any feeling of constriction; modern upholstery fabrics and curtains provide a pleasant environment even on long trips.

Cut-off valves for each individual appliance

Fresh water supply with two 15 litre canisters and immersion pump

Some of the accessories shown are not included as standard – available with surcharge.

*Approx. – depending on basic vehicle and equipment

**See additional information on page 12

Trail / Box 220

Suitable basic vehicles:**

Ford Ranger | Isuzu D-Max | Jeep Gladiator | Mercedes X-Class | Nissan Navara | Toyota Hilux | VW Amarok

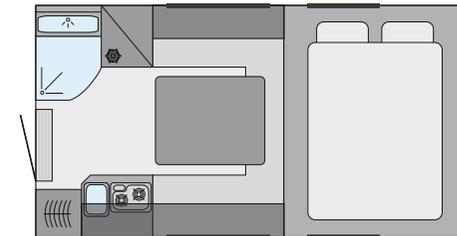

Within a very short space of time, the VW Amarok has become one of the most popular pick-up models. With the Trail/Box 220 model, the Tischer range has the matching demountable cabin.

The vehicle has now undergone both an optical and above all a technical facelift. Greater power thanks to the V6 engine now also permits off-road tours. Our model Trail/Box 220 is tailored exactly to the Amarok to give a cohesive appearance. The cabin unit is 382 cm long and barely wider than the basic vehicle. The resulting unit is compact and thus perfect for use on dirt roads and serpentines. The bright and cosily-designed interior has a dinette with seating for two to three. The equipment also includes a wardrobe, galley kitchen and a sanitation room with cassette WC, wash basin, shower and cabinet with mirror.

**See additional information on page 12

Trail / Box 230/230S

Suitable basic vehicles:**

Ford Ranger | Isuzu D-Max | Jeep Gladiator | Mercedes X-Class | Nissan Navara | Toyota Hilux | VW Amarok

The Trail/Box 230 and 230S models are particularly suited to all pick-ups with Double cab.

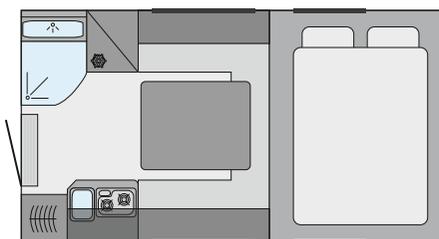

Here you can choose between rear entrance (230) and side entrance (230S). In terms of the extensive equipment, on the other hand, there are no differences. Both versions make a convincing impression with abundant space and comfort, the standing height is a pleasant 1.95 m. The kitchen, four cosy seats, a large bed in the alcove and generous storage make even long trips a pleasure. With just minimal adjustment, the seating group can be converted into a further bed.

Also on board is a washroom with large, fold-down wash basin and a warm water system. The washroom features a bench WC thus ensuring a clear layout with no sharp edges. A further plus: easy cleaning is guaranteed.

Trail / Box 240

Suitable basic vehicles:**

Ford Ranger | Isuzu D-Max | Jeep Gladiator | Land Rover Defender | Mercedes X-Class | Nissan Navara | Toyota Hilux | VW Amarok

Spacious, comfortable, variable – our Trail/Box 240 model makes a convincing impression with these and further features.

With the Ford Ranger as the basic vehicle, you will drive comfortably and absolutely safely. As the first pick-up in the Double cabin version, the Ford Ranger was awarded five stars in the Euro-NCAP crashtest.

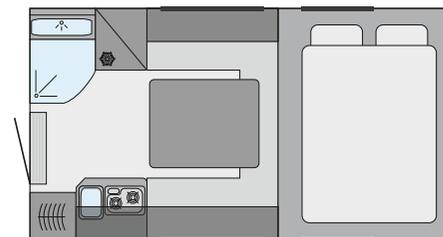

And five stars also go to our pick-up cabin: The Trail/Box 240 has a very special feature.

It is suitable for both One-and-half and Double cabins. With this model featuring rear entrance, lack of space is a thing of the past. Generous dimensions and a standing height of 1.95 m, as well as numerous storage compartments turn even long journeys into a pleasure trip. The modern design of the interior and perfectly matching handcrafted furniture demonstrate our vast experience in the construction of motor homes.

Trail / Box 250/275S

Suitable basic vehicle:**

Dodge RAM 2500 / 3500

Family holidays with a pick-up? Why not? Our de-mountable Trail/Box 250 cabin with rear entrance and 275S with side entrance are mobile holiday apartments for a family of four.

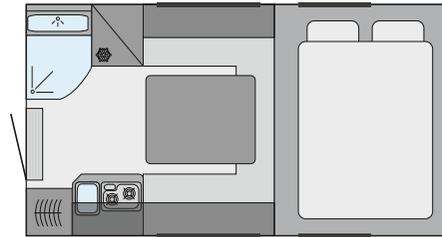

The roomy motor home cabin is particularly suited to American pick-ups with truck beds of around 1.99 m (6 ft) length. Thanks to the capacity of the basic vehicle and the large driver's cab, holidays with the family or as a group are easily possible, without making any compromises in holiday enjoyment and accommodation comfort. The interior space is correspondingly generous. The standing height is a pleasant two metres.

Built-in units in the highest workmanship, numerous storage compartments, modern, hardwearing upholstery fabrics and covers, as well as state of the art engineering, are only some of the many standard fitting details. The washroom designed for cabins with very little rear protrusion is compact yet completely equipped.

Trail / Box 260/260S

Suitable basic vehicles:**

Ford Ranger | Isuzu D-Max | Isuzu XL | Nissan Navara | Toyota Hilux | VW Amarok Double cab | VW Amarok Double cab XL

No wish remains unfilled: Our 260 model with rear entrance or 260S with side entrance offer the optimum in spacious comfort for up to four occupants.

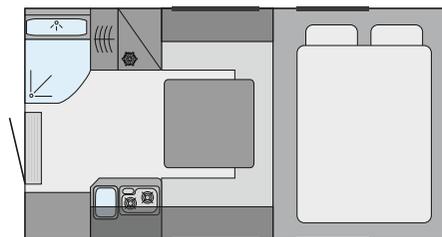

The living area offers enough space for relaxing, down-time, sleeping and for joint activities. Galley, four comfortable seating spaces, large beds, 1,95 m standing height, generous storage space and a washroom with large, fold-down wash basin provide an abundance of comfort. The bench WC stretches right across from right to left and ensures a clear layout.

Modern engineering, generous filling capacities including a 45 litre underfloor waste water tank and lots of further details round off the extensive equipment. The Trail/Box 260/260S also displays a further special feature: It fits onto both pick-ups with One-and-a-half cab and the Isuzu XL with Double cabin and extended truck bed.

**See additional information on page 12

Trail/Box 260R/260RS

Suitable basic vehicle:**

Land Rover Defender

The model corresponds essentially to the Trail/Box 260/260S model but is designed especially for the Land Rover Defender 130.

The most obvious difference is the standing height of 2.14 m, resulting from the adaptation to the higher driver's cab in the Defender. This makes the already spacious interior appear even airier. In addition, the cabin also offers additional storage space. Like all our cabins, the washroom also features the new, modern wall decor. The darker shade provides an attractive contrast to the white bathroom fittings.

Typical for Tischer, workmanship and quality are of the highest level: The modern sandwich construction technique and a stove-enamelled aluminum outer membrane make the cabin robust – even suitable for holiday trips off-road and far from civilization. The 200 and 240 models are also available for the Land Rover Defender with a surcharge.

Trail / Box 260SD

Suitable basic vehicles:**

Ford Ranger | Isuzu D-Max | Land Rover Defender | Nissan Navara | Toyota Hilux | VW Amarok Double cab XL

The demountable cabin Trail/Box 260SD is the ideal holiday home for a relaxed and extended trip for two.

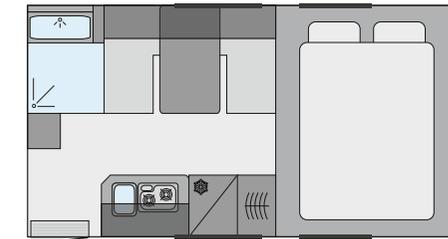

Abundant space including a seating dinette at the side, generous storage space in the living area and a comfortable, wider washroom with large shower guarantee relaxed travel and every comfort. A space-saving sliding door leads into the washroom. The extensive standard equipment also includes two camping chairs and a table, close at hand in a practical external storage space at the back. With the 100 litre fresh water tank, two 5 kg gas cylinders and the 50 litre waste water tank, even extended holidays without a stop at a campsite pose no problems.

You are completely self-sufficient on your travels and at the same time enjoy all the comforts of a completely equipped camper. Your personal holiday home on wheels awaits you!

Trail / Box 280/280S

Suitable basic vehicles:**

VW T4/T5/T6/T7 Double cabin | VW T4/T5/T6/T7 single cabin – short wheel base

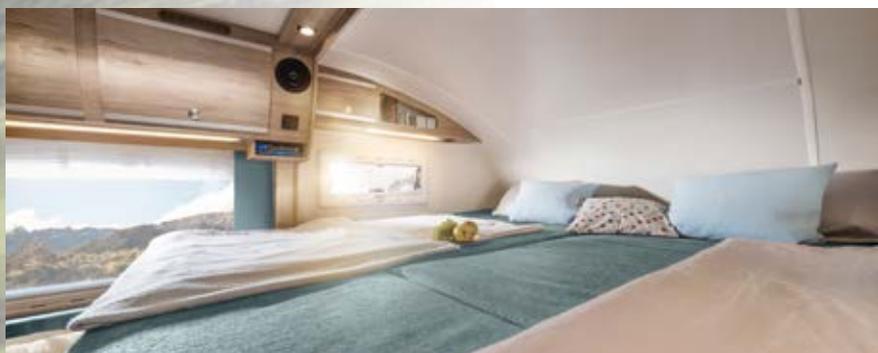

The Trail/Box 280 cabin model (with back entrance) and the 280S version (with side entrance) were specially designed for VW flatbed trucks.

The series is further developed and the cabins are now available for T4, T5, T6 and new T7. With a standing height of 2.03 m, both versions are characterised by lots of space and comfort for four occupants. With a functionally-equipped kitchen and complete bathroom, nothing is left to be desired, even on longer trips. To make the interior even more comfortable, the floor plan and layout have been further optimized. A round table seating area now makes the successful Trail 280/280S model even more family-friendly.

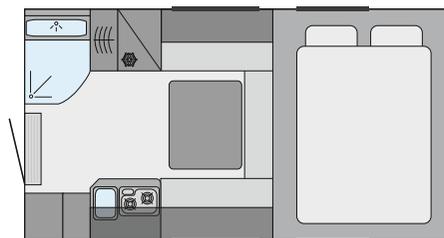

The series flatbed from Volkswagen come up trumps with a special feature: during mounting, the tailboard just has to be detached for the cabin to fit like a glove. Couldn't be less complicated.

My Tischer.
My adventure.

Equipment

Unstoppably free: with standard comfort and many extras.

Interior Worlds

Interior & features: your mobile home.

Living, sleeping, cooking, relaxing – and all in our demountable cabin.

Ideal built-in units, comfortable seating elements and abundant storage space permit relaxed travelling. Generous bed dimensions and the optional lengthwise bed version ensure a good night's sleep.

Compact Kitchen

Optimized ergonomics and use of space.

The new kitchen is even more spacious and ergonomically designed, and it travels everywhere with you!

The cooking area is clearly delineated from the area for washing up, making things even more ergonomic. The powerful compressor fridge doesn't just keep your food perfectly fresh; it will also give you plenty of enjoyment when you're on the move.

Space-saving Bathroom

Plenty of space in the smallest of rooms.

The new bathroom concept from Tischer is a model of space utilization, function and comfort with space for a folding wash basin, shower, toilet, wall cabinet to make mobile life comfortable.

The guide of the shower door has been optimized to use up less living space when the bathroom is not in use. The large wash basin, which now folds away lengthwise in the driving direction, offers plenty of room in the smallest of spaces. An innovative solution ensures that residual water is collected even better than before after use of the wash basin.

Furniture Manufacture

High quality and comfortable.

Tradition and innovation go hand in hand:

We produce precisely tailored furniture, emphasising both functionality and wellbeing in the interior. Everything you need has a place of its own, close at hand. At the same time, we strive to provide open spaces, appealing surfaces and comfortable seating. Special wishes present no problems either: Additional storage space, individual interior fittings or even greater comfort – we execute even the most unusual of ideas to meet your specifications exactly.

Selection of Fabrics

The stuff that dream journeys are made of.

Modern fabrics, new trend colors, and lots of extra features: we make sure that you feel comfortable in your cabin.

Our upholstery and curtain fabrics are available in five high-quality variants. For even more individuality and personality, you can also choose our curtains as panel curtains or Roman blinds with matching decorative scarves.

Whether you prefer striking colors, a maritime flair, or a subtle ambience: our designs offer something for everyone. Choose according to your taste!

Clean job! *Easy to clean and hygienic*

We only use high-quality, hard-wearing fabrics from German quality weaving mills to ensure that you enjoy your upholstery for a long time to come. All upholstery fabrics can be easily removed and washed. They can also be cleaned with alcohol based disinfectants, once a small test has been carried out in a concealed spot. The detailed care instructions for our fabrics can be found here:

tischer-pickup.com/en_fabric-cleaning

Cargo Area

Optional extras in brand quality.

The cargo area of your pick-up deserves that little bit extra. We take care of the cover and coating.

In addition to its beefy, powerful appearance, a pick-up is of course characterized above all by its cargo area. This offers considerable advantages both professionally and privately and therefore deserves to be equipped accordingly. With our optional cargo area cover or a suitable coating, the usable space of your pick-up truck becomes robust, weather-resistant, and secure. An investment that pays off after just a short time.

Rhino Linings® for flatbeds

For every Tischer cabin we recommend the spray-on two-component plastic coating Rhino Linings® for flatbeds and truck beds. In addition to outstanding non-slip properties and sound insulation, Rhino Linings® coatings offer a permanently attractive appearance. The water and air permeable material is an outstanding alternative to conventional, loose truck bed lining and has been in use in the USA for lining truck beds since 1988.

Cargo area cover

The visually appealing aluminum cover with integrated water drainage is extremely sturdy, can be opened completely or partially, and fits the inner contours of the cargo area perfectly. Once the panels are closed, the cover can be locked. The cover is attached to the retaining parts with just two screws – this works easily even with existing edge protection.

The cover has a load capacity of up to 150 kg. The hinges are made of EPDM (ethylene propylene diene rubber), a synthetic rubber that is corrosion-resistant, acid-resistant, and climate-resistant. Thanks to the weather-resistant material, the cargo area cover can withstand moisture, heat, and frost. In addition, thanks to the locked cover and closed tailgate, everything is stored securely and protected against theft.

Leisure Time & More

Simply flexible – flexibly simple.

The compact dimensions of our pick-up and demountable cabins simplify travelling with a trailer and provide you with unimaginable flexibility on holiday.

Long combinations that turn winding roads into a test of courage, and multiple attempts to fit into a parking space become things of the past with Tischer demountable cabins. Horse box, boats or motorbike trailers can be towed with different basic vehicles in combination with various cabin and tow bar types. Alterations to the drawbar (stabilizing wheel) may be necessary. A trailer bracket extension (Harbeck system) is possible with a restricted tow load of max. 1,700 kg.

E-bike, mountain bike, racing bike ...

Transporting bikes is really easy with our demountable cabins: with a bike rack directly at the rear, the bike simply comes along too. Depending on the entrance, the bike rack is attached to our pick-up models as either a fixed or a fold-away version. So on your travels you can get close to nature on two wheels and enjoy your hobby to your heart's content.

Travel in comfort and yet remain completely flexible: No matter what hobby you want to take along, we will find the right individual solution for you and your four-wheel vehicle!

Contact us. We would be pleased to advise you on possible combinations and trailer loads.

Equipment

Comfort and luxury in series.

Even as they leave the plant, our demountable cabins are extensively equipped. We pay attention to sensible details, manufacture high-quality furniture in our own carpentry workshop, and rely on the quality of market leaders when it comes to technology. Optional features give you the opportunity to further increase comfort and adapt it to your individual needs.

My getaway.

Service & Classic

Your base camp on four wheels: comfort, service, and flexibility.

Service & Guarantee

Comprehensive care. Excellent support.

We are here for you. That's a promise! At Tischer, we offer not only custom-made cabins, but also comprehensive service.

When you receive your new Tischer cabin, we provide you with detailed operating instructions – including information on all installed technical equipment.

This means you can immediately get to work yourself and have everything under control while on the road. And if something does need to be replaced, we will usually send you the necessary spare parts within one business day.

More information

Easy to configure

Design your Tischer just the way you want it. Our new cabin configurator lets you choose from a wide range of high-quality options for every detail.

Rent and test spontaneously

Tip: you can also rent our pick-ups and demountable cabins. Ideal for thoroughly testing the combination of pick-up and cabin on your next vacation.

Stay safe on the road

With the right insurance, you are well covered for every adventure. Our partner ESV Schwenger will be happy to provide you with a quote – tailored perfectly to your needs.

Workshop & maintenance

From regular maintenance to crucial spare parts: we offer you the best support so that you can enjoy your Tischer cabin for a long time to come.

Tischer individual

Special requests? No problem! Whether it's the features, paintwork, size, or material: with our wealth of experience and expertise, we can make your dream vehicle a reality.

Dealers and partners

Always close to you: The Tischer family includes a growing network of selected dealers and partners. This means you are always just a stone's throw away from us.

Tischer Classic

For our most loyal fans: care, restoration, and preservation.

Our most important principle for over 50 years company history: we care not only about vehicles with living quarters, but also about maintaining direct contact with their owners.

That is why we maintain close communication with the Tischer Classic community. We know firsthand that many Tischer classic cars have been on the road for 30-40 years. This impressively demonstrates what engineering, clever technology, and attention to detail can achieve.

We provide the best possible support to all long-standing Tischer owners, helping them to maintain their beloved vehicles through careful care and restoration.

★★★★★

TISCHER

Classic

SINCE 1973

Sustainable success across the board.

A vehicle that still works reliably after decades feels practically like a member of the family. And we, too, are particularly proud of such long-running favorites.

They demonstrate how sustainability and mobility can be successfully combined. Because durable vehicles save valuable resources and thus also protect the environment.

Tischer Workshop

Accident repairs. Maintenance. Spare parts.

***Need repairs? We'll get it back in shape.
With Tischer Classic, we offer top-notch support –
as loyal cabin owners in the Tischer community
confirm time and time again.***

Our workshop is fully equipped to carefully maintain, renovate, and repair historic Tischer vehicles. Of course, we only use original parts, which are exclusively available from us.

Tischer vintage cabin model 245 from 1989

Tischer XL 65 from 1990

A win-win situation for vintage models.

They are professionally serviced in our workshop – and repaired if necessary. The advantage: at Tischer, you can be sure that real experts will take care of all the special features of your model in the best possible way. From the use of original parts to little tricks learned from over 50 years of experience in cabin construction.

Tischer Individual

Individual vehicles & special products.

Some adventures simply don't fit into the standard format. That's why we offer cabins that are as individual as you are.

From clever space solutions and technical extras to tailor-made equipment – we can fulfill your every wish. We implement your ideas perfectly and precisely.

Tischer Box 260S on Nissan Navara, platform flatbed with fold-down, detachable tailboards

Tischer Trail 340S: fixed structure on VW T5 chassis

Tischer Trail 230S on VW Amarok – “The Beast 2.0” with Delta Offroad tuning

Tischer Box 340S in XXL format on MAN TGE 3.180 transporter (4X4 Double cab)

Tischer Trail-Liner: mobile home as low-bed trailer (fifth wheeler)

Tischer Box 260SP Flatbed on Isuzu D-MAX Double cab with flat bed. The highlight is the foldable rear seating area.

My Tischer.
My freedom.

World of Tischer

On the same wavelength as you: comfort, service, and flexibility.

Company

Tischer: family business with over 50 years of tradition and experience.

Our home has been the Kreuzwertheim industrial area Wiebelbach, in the heart of Mainfranken, since 1978. The gradual expansion of the plant site has enabled us to improve our cabin construction over the years. All the cabin construction stages are completed at our factory – from the design phase to final assembly.

Visit our showroom for a personal consultation! We assemble your cabin directly at our factory, then give you all the instructions for your cabin on your vehicle. We also carry out service and repairs at our factory.

And if you're just passing through, why not stay overnight at one of our campsites?

Simply call us in advance at +49 (0)9342 8159.

We look forward to seeing you!

Tischer GmbH Freizeitfahrzeuge **Camping passion made in Germany.**

Did you know that the beginning of our success story was a motorhome cabin for a VW flatbed truck? Peter Tischer and his father Josef wanted to build a maneuverable home to take on the road. The idea was so successful that it gave rise to an entire company, Tischer GmbH.

Today, our family-owned company based in Kreuzwertheim designs and manufactures demountable cabins for almost all pick-ups available on the German market. With around 50 employees, we produce more than 240 cabins per year. Thanks to high-quality materials, precision craftsmanship and attention to detail, cabin after cabin is created in top "Made in Germany" quality.

Yours, Patrick Sauer

A handwritten signature in black ink, appearing to read 'P. Sauer'.

Chronicle

Tischer – a history of success.

- 1973** Our first self-built living cabin on a VW flatbed truck.
- 1978** Tischer grows: move into new company premises in Wiebelbach.
- 1980** Brands such as Ford, Mercedes, Mitsubishi, and Toyota expand our range of basic vehicles.
- 1982** Founding of Tischer GmbH Freizeitfahrzeuge.
- 1986** The Nissan pick-up becomes the central basic vehicle.
- 1990** Peter Tischer takes over as managing director.
- 1990** The Trail model series is introduced.
- 2001** The Box model series is added to the product range.
- 2013** Anniversary! We celebrate 40 years of Tischer Freizeitfahrzeuge.
- 2013** The new construction and renovation of the company headquarters in Kreuzwertheim is completed.
- 2014** Record-breaking: the 4,000th Tischer cabin is manufactured.
- 2015** 178 Tischer cabins are now produced annually.
- 2016** Award win for Tischer: the 260S model is named "The Perfect Motorhome 2016" by Reisemobilist magazine.
- 2017** Another award for Tischer: our Trail and Box models receive the "2017 Cabin Seal of Approval for Robust Construction."
- 2018** More capacity for the future: we expand our factory with a new production hall.
- 2021** The factory continues to grow: construction of a hall for initial assembly and vehicle conversions.
- 2022** Generational change: Patrick Sauer takes over management of the company from his stepfather Peter Tischer.
- 2023** Tischer celebrates its 50th anniversary and is well positioned for the future – thanks in particular to expanded production capacities with a new factory building, the CNC department, and the furniture manufacturing facility.
- 2024** The Tischer Meeting celebrates its 25th anniversary.
- 2026** ***New year. New models. New adventures!***

Sustainability

Environmentally friendly travel.

With our demountable cabins and trailers, the adventure begins where everyday roads end. But despite our love of freedom, we always take care of our environment. Tischer actively takes responsibility for a sustainable future. We prove this every day in our operations and in every detail of our cabins.

Solar cells on the roofs of our production halls generate the electricity we need. And we use regional materials in the construction of Tischer cabins. True to the motto: short distances, sustainable attitude. On request, we can equip your cabin with water-saving systems or a dry toilet. This makes sustainable travel a matter of course for everyone on all routes.

Because sustainability can be very easy. The best example: our lightweight construction technology is pure environmental protection. Thanks to innovative floors without wood, we reduce the total weight and thus conserve resources.

All this results in Tischer cabins that are not only produced in an environmentally friendly way, but also impress year after year with their durability. Many have been on the road for over 30 years: reliable, robust, adventurous.

100 %
self-sufficient with solar power.

50 %
less water consumption thanks to water-saving systems.

0 %
wood in the floor area (from 2026) means:
less weight & conserved resources.

Tischer Community

Friends meet friends: online and on the road.

Anyone who has ever been to a Tischer Meeting feels it immediately: there is a very special connection between riders, fans, and free spirits. Every year, they all come together at the Tischer Meeting – an absolute highlight for us!

Impressions from the Tischer Meeting 2025

Because it is here, in human interaction, that we see what makes Tischer so fascinating for us. Encounters turn into friendships – driven by the same passion for freedom and quality.

This bond makes us proud. For over 50 years, Tischer has stood for more than just travel and for a living community that grows year after year.

Online, the new Tischer Forum offers the community a digital home for technical discussions, exchanges of ideas, and travel inspiration. Accessible at any time on our website – anytime, anywhere. Share your experiences: every idea, every input, every tip enriches the Tischer world.

***Be part of it – online or at the next meeting.
Because together, the journey is simply better.***

Tischer Insight

News & innovations.

Top results in cold chamber testing for Tischer cabins.

Anyone who chooses a Tischer demountable cabin will always enjoy the dream combination of living comfort and reliable technology when traveling. And to ensure that this remains the case, we regularly check our quality with extensive tests and inspections.

CEO Patrick Sauer presents.

Competent, exciting, authentic: in these videos, Tischer managing director Patrick Sauer personally introduces you to our cab models.

Take a look now

Twice as strong: Tischer wins another award!

Our trophy collection continues to grow: at the CampingLife Trophy 2025 organized by AUTO ZEITUNG, the Tischer model Trail/Box 230S impressed the expert jury. And the Trail 230S variant also cleaned up: in the reader vote by AUTO BILD, Tischer won THE GOLDEN MOTORHOME 2025.
