MOBILE FLEXIBILITY WITH COMFORT AND SERVICE 2023 E

### 50 YEARS OF TEAM SPIRIT!

#### Dear customers,

The TISCHER company had barely been founded five decades ago, when the idea was born to invite our customers to a friendly meet-up once a year over the Ascension Day public holiday. As a result, pick-ups and demountable cabins came together from all over time and time again. The most important "program items" have always been a sense of team spirit and simply having fun in a chilled group.

After the coronavirus threw a spanner in the works in 2020/2021, it was finally time in 2022 to once again welcome 185 participants to the TISCHER meet-up in Eigeltingen. I am now looking forward to the anniversary meet-up in 2023 more than ever, which will be held under the motto "50 years of Tischer, 50 years of team spirit". I look forward to seeing you!

Yours, Patrick Sauer

Pictures from the 2022 Tischer meet-up can be found here:

Simply scan the QR code. And you're part of the action!

# **TISCHER AND PICK-UP**

THE MOST FLEXIBLE WAY TO ENJOY A MOBILE HOLIDAY

The pick-up is an iconic American invention. Since the 1920s, this vehicle type has been deployed in the USA for nearly all purposes.

The idea of using the pick-up as the basis for a motor home was also born in the USA. It was perfected and quality-enhanced, on the other hand, by us Europeans. The desire for unrestricted mobility when travelling is particularly marked among campers. However, a combination of car and caravan is difficult to manoeuvre in the city or in mountainous regions, and many motor homes reach the end of the road here because of their size. Not too big for city traffic, not too small for comfortable travel – a pick-up with comfortable demountable cabin is the ideal basis for flexible mobility.

The major advantages of TISCHER demountable cabins: Not only are they particularly simple to demount and mount, the pick-up's bed is fully usable again once the cabin has been removed. Have a look at the following pages and convince yourself of the numerous benefits of TISCHER demountable cabins. You will be surprised at the possibilities offered to you by a demountable cabin from TISCHER!

S Stand

### **50 YEARS OF TISCHER** HALF A CENTURY OF FUN TRAVEL FOR OUR CUSTOMERS

Tradition and innovation. Quality and precision. Craftsmanship and passion. To this day, these are the values on which we have built our successful family business. We have now been around for 50 years, and on this occasion we are thrilled about how many people we have been able to provide with the most beautiful outdoor experiences in five decades.

It has always been typical of TISCHER not to stop at solutions once they have been achieved. Continuous innovation is important to us. You will quickly notice this as you continue to browse.

For example, among other things, you can also get to know the new bathroom concept from TISCHER on the following pages. This is just one of countless innovations we have developed and presented in 50 years. Just you wait and see! More will follow to inspire our customers again and again in future. Never stop discovering!

# **PICK-UP CABINS**

TRAIL version

TANK AND

### TRAIL OR BOX? WHAT'S YOUR PREFERENCE?

When it comes to pick-up cabins, do you prefer the classic shape of our BOX version? Or is our somewhat sleeker TRAIL model more your thing? Both are very positively rated by TISCHER customers. Here we briefly show you how they differ from one another:

The modern looking *TRAIL version* is more streamlined at the alcove above the pick-up's passenger compartment. This improves the aerodynamics and provides more space inside. The material used is double-shell foam-filled GRP molded parts. The flat surface at the front is ideal for installing a pair of additional headlights if you want.

Due to its slightly more angular appearance, the *BOX version* looks bigger. In terms of material and manufacturing quality, it is in no way inferior to the TRAIL model. It is also built from high-quality sandwich panels. However, the production process is less complex. That is why we can offer this model cheaper.

# **MOUNTING AND DEMOUNTING**

TISCHER

ISCHER

https://bit.ly/3Pl09vg

### THE PICK-UP CABIN MOUNTING AND DEMOUNTING MADE EASY

Mounting and demounting the cabin is easy with the aid of the retractable supports. Thanks to the professional familiarisation session conducted by our specialist staff when the vehicle is being handed over, and with just a little practice, mounting and demounting can be done in 20 minutes.

WORLD OF TISCHER & SERVICE

Extend supports with cordless screwdriver or crank handle

Turnbuckle and 13-pin socket

#### DEMOUNTING

**TRACHE** 

For demounting, you just have to release the attachments between cabin and pick-up and drop the four supports to the ground. The supports are extended with the help of a crank or cordless screwdriver until the cabin is separated from the vehicle. Once you have driven the vehicle away, you lower the cabin slightly to facilitate easy entry.

#### MOUNTING

Mounting the cabin is just as easy, just in the reverse order: Lift the cabin until you can drive the pick-up beneath it. Now lower the cabin again, attach the brackets, plug in the 13-pin plug for the lighting as well as the 3-plug for the battery and retract the supports.

### **SMART CONSTRUCTION**

Every TISCHER cabin is designed to ensure that the truck bed need not be altered; it can be used without restriction following demounting.

1 DOLLAR

#### Mounting and demounting in just 20 minutes

# PRODUCTION

### **CABIN CONSTRUCTION** MODERN ENGINEERING AND TRADITIONAL HANDCRAFTING

From the initial design to the finished TISCHER cabin, we take your wishes and requirements into account. That is why, with the most modern machine engineering and the highest standards of precise workmanship, our staff produce premium-quality demountable cabins "Made in Germany". You get your premium-quality home on the road from us. Customers have valued us for this standard for 50 years.

The cabin is constructed to a sandwich design. The aluminium sheeting, solid foam and internal plywood panel are glued under pressure. Thereafter, the CNC-machined cabin components are precisely assembled. This construction technique offers a number of advantages: a high level of stability, low weight and outstanding insulating properties.

## **INTERIOR AND EQUIPMENT** SPACIOUS AND COMFORTABLE

Living, sleeping, cooking, relaxing – and all in our demountable cabin. Ideal built-in units, comfortable seating elements and abundant storage space permit relaxed travelling. Generous bed dimensions and the optional lengthwise bed version ensure a good night's sleep.

### **HOME COOKING ON BOARD** YOUR KITCHEN WITH ONLY THE BEST INGREDIENTS

If you want to whip up a few delightful treats on the road, you can do so in the fully equipped TISCHER kitchen. All the ingredients are there: from the three-burner gas stove, the spacious refrigerator and the comfortable seating area to the huge range of perfectly divided storage space. So not only can you look forward to driving away and stopping at beautiful locations, but you can also enjoy plenty of good eating along the way.

# **INTERIOR WORLDS**

### YOU MAKE THE CHOICE!

WE MAKE YOUR WISHES COME TRUE

For even more individuality and personality, we offer our curtains in modern form as panel curtains or Roman blinds with matching decorative curtains. With our Lagona, Dimare, Limea and Delio and Savaro fabric designs, there is something for everyone. Whether it's eye-catching colors, maritime flair or a low-key, understated feel:

You choose to suit your taste!

### **CLEAN JOB!** EASY TO CLEAN AND HYGIENIC

DWe only use high-quality, hard-wearing fabrics from German quality weaving mills to ensure that you enjoy your upholstery for a long time to come. All upholstery fabrics can be easily removed and washed. They can also be cleaned with alcohol-based disinfectants, once a small test has been carried out in a concealed spot. The detailed care instructions for our fabrics can be found here:

### **SELECTION OF FABRICS** MODERN AND CLASSICALLY ATTRACTIVE

With modern fabrics, fashionable trend colours and lots of extras for the individual interior design of your demountable cabin, we ensure that you feel at home. Our upholstery and curtain fabrics are available in a choice of five different versions.

**IDEA & PRODUCTION** 

Compact, light and spacious – with these features, the demountable cabin TRAIL/BOX 200 is the ideal travel companion for couples taking active holidays.

The TRAIL/BOX 200 model is suitable for both one-and-a-half cabin and double-cabin pick-ups. In combination with a one-and-a half cabin, the demountable cabin is almost flush with the back of the basis vehicle. This means the slope angle of the pick-up is not restricted and the special construction technique of our most popular and lightest cabin means that good cross-country mobility is assured.

DE

TISCHER

In the interior, numerous comfort features immediately become evident: a standing height of 1.95 m, a central seating group which can be converted to a bed area and the generous bed dimensions prevent any feeling of constriction; modern upholstery fabrics and curtains provide a pleasant environment even on long trips.

Within a very short space of time, the VW Amarok has become one of the most popular pick-up models. With the TRAIL/BOX 220 model, the TISCHER range has the matching demountable cabin.

The vehicle has now undergone both an optical and above all a technical facelift. Greater power thanks to the V6 engine now also permits off-road tours. Our Model TRAIL/BOX 220 is tailored exactly to

the Amarok to give a cohesive appearance. The cabin unit is 382 cm long and barely wider than the basis vehicle. The resulting unit is compact and thus perfect for use on dirt roads and serpentines. The bright and cosily-designed interior has a dinette with seating for two to three. The equipment also includes a wardrobe, galley kitchen and a sanitation room with cassette WC, wash basin, shower and cabinet with mirror.

The TRAIL/BOX 230 and 2305 models are particularly suited to all Japanese pick-ups with double-cabin driver's cab.

STATISTICS.

Here you can choose between rear entrance (230) and side entrance (230S). In terms of the extensive equipment, on the other hand, there are no differences. Both versions make a convincing impression with abundant space and comfort, the standing height is a pleasant 1.95 m. The kitchen, four cosy seats, a large bed in the alcove and

generous storage make even long trips a pleasure. With just minimal adjustment, the seating group can be converted into a further bed. Also on board is a washroom with large, fold-down wash basin and a warm water system. The washroom features a bench WC thus ensuring a clear

TISCHER

layout with no sharp edges.

A further plus: easy cleaning is guaranteed.

Spacious, comfortable, variable – our TRAIL/BOX 240 model makes a convincing impression with these and further features.

With the new Ford Ranger as the basis vehicle, you will drive comfortably and absolutely safely. As the first pick-up in the double-cabin version, the Ford Ranger was awarded five stars in the Euro-NCAP crashtest. And five stars also go to our pick-up-cabin: The TRAIL/BOX 240 has a very special feature. It is suitable for both one-and-half and double cabins. With this model featuring rear entrance, lack of space is a thing of the past. Generous dimensions and a standing height of 1.95 m, as well as numerous storage compartments turn even long journeys into a pleasure trip. The modern design of the interior and perfectly-matching handcrafted furniture demonstrate our vast experience in the construction of motor homes.

MARACHARDS. MSPe PT 91

Family holidays with a pick-up? Why not? Our demountable TRAIL/BOX 250 cabin with rear entrance and 2755 with side entrance are mobile holiday apartments for a family of four.

The roomy motor home cabin is particularly suited to American pick-ups with truck beds of around 1.99 m (6 ft) length. Thanks to the capacity of the basis vehicle and the large driver's cab, holidays with the family or as a group are easily possible, without making any compromises in

holiday enjoyment and accommodation comfort. The interior space is correspondingly generous.

The standing height is a pleasant two metres. Built-in units in the highest workmanship, numerous storage compartments, modern, hardwearing upholstery fabrics and covers, as well as state of the art engineering, are only some of the many standard fitting details. The washroom designed for cabins with very little rear protrusion is compact yet completely equipped.

No wish remains unfilled: Our 260 model with rear entrance or 260S with side entrance offer the optimum in spacious comfort for up to four occupants.

The living area offers enough space for relaxing, down-time, sleeping and for joint activities. Galley, four comfortable seating spaces, large beds, 1,95 m standing height, generous storage space and a washroom with large, fold-down wash basin provide an abundance of comfort. The bench WC stretches right across from right to left and ensures a clear layout.

MSP PT 19

1

TISENER

Modern engineering, generous filling capacities including a 45 litre underfloor waste water tank and lots of further details round off the extensive equipment.

The TRAIL/BOX 260/260S also displays a further special feature: It fits onto both pick-ups with one-and-a-half cabin driver's cab and the VW Amarok XL with double cabin and extended truck bed.

WORLD OF TISCHER & SERVICE

The model corresponds essentially to the TRAIL/BOX 260/260S model but is designed especially for the Land Rover Defender 130.

The most obvious difference is the standing height of 2.14 m, resulting from the adaptation to the higher driver's cab in the Defender. This makes the already spacious interior appear even airier. In addition, the cabin also offers additional storage space. Like all our cabins, the washroom also features the new, modern wall decor. The darker shade provides an attractive contrast to the white bathroom fittings.

DEFENDE

TISCHER

Typical for TISCHER, workmanship and quality are of the highest level: The modern sandwich construction technique and a stove-enamelled aluminium outer membrane make the cabin robust – even suitable for holiday trips off-road and far from civilization. The 200 and 240 models are also available for the Land Rover Defender with a surcharge.

The demountable cabin TRAIL/BOX 260SD is the ideal holiday home for a relaxed and extended trip for two.

Abundant space including a seating dinette at the side, generous storage space in the living area and a comfortable, wider washroom with large shower guarantee relaxed travel and every comfort. A spacesaving sliding door leads into the washroom. The extensive standard equipment also includes two camping chairs and a table, close at hand in a practical external storage space at the back. With the 100 litre fresh water tank, two 5 kg gas cylinders and the 50 litre waste water tank, even extended holidays without a stop at a campsite pose no problems. You are completely self-sufficient on your travels and at

Interior fittings TRAIL/BOX 260SD

#### TECHNICAL DATA

Total width\* 210 cm

Total length\* 617 cm

Total height\* 299 cm / Standing height 195 cm

Platform length 435 cm / Floor length inside 269 cm

Bed dimensions alcove 198 x 150 cm

Bed dimensions seating group 198 x 146/96 cm\*\*

#### GAS, WATER & HEATING SYSTEM

Storage space for two 5 kg gas cylinders (not included in the standard scope of delivery), accessible from outside

Gas heating "TRUMA Combi 4E" with water heating system (boiler 10 litre)

Cut-off valves for each individual appliance

Fresh water supply with 100 litre tank and pressure pump

50 litre waste water tank as underfloor tank

#### SUITABLE BASIS VEHICLES \*\*\*

Ford Ranger, Isuzu D-Max, Land Rover Defender, Nissan Navara, VW Amarok Double Cab XL

Some of the accessories shown are not included as standard – available with surcharge. \*Approx. – depending on basis vehicle and equipment

\*\*No standard equipment

\*\*\*See additional information on Page 51

The TRAIL/BOX 280 cabin model (with back entrance) and the 280S and 285S models (both with side entrance) were specially designed for VW flatbed trucks.

The series is further developed and the cabins are now available for T4 and T5 and the new T6. With a standing height of 2.03 m, all three versions are characterised by lots of space and comfort for four occupants. With a functionally-equipped kitchen and complete bathroom, nothing is left to

be desired, even on longer trips. A further special feature of the model: on request, we provide access to the driver's cab; in doing so we also alter the backrest of the back seat. For short trips or shopping without the cabin, the opening can be closed quickly and simply using a door and plastic panel.

The series flatbed from Volkswagen come up trumps with a special feature: During mounting, the tailboard just has to be detached for the cabin to fit like a glove. Couldn't be less complicated.

# **TRAIL/BOX 280/2805**

Access to the driver's cab optional

#### **FAMILY BUSINESS** OVER 50 YEARS OF TRADITION AND EXPERIENCE

Our home has been the Kreuzwertheim industrial area Wiebelbach, in the heart of Mainfranken, since 1978. The gradual expansion of the plant site has enabled us to improve our cabin construction over the years. All the cabin construction stages are completed at our factory – from the design phase to final assembly. Visit our showroom for a personal consultation! We assemble your cabin directly at our factory, then give you all the instructions for your cabin on your vehicle. We also carry out service and repairs at our factory. Are you passing through? Why not spend the night on one of our parking spaces. You are welcome to come and visit us! Tel. +49 (0) 9342 81 59

PICK-UP CABINS

# COMPANY

#### **TISCHER GMBH FREIZEITFAHRZEUGE** CAMPING PASSION MADE IN GERMANY

Did you know that the beginning of our success story was a motorhome cabin for a VW flatbed truck? Peter Tischer and his father Josef wanted to build a maneuverable home to take on the road. The idea was so successful that it gave rise to an entire company, TISCHER GmbH.

Today, our family-owned company based in Kreuzwertheim designs and manufactures demountable cabins for almost all pick-up available on the German market. With nearly 50 employees, we produce more than 230 cabins per year. Thanks to high-quality materials, precision craftsmanship and attention to detail, cabin after cabin is created in top "Made in Germany" quality.

Yours, Patrick Sauer

MORLD OF TISCHER & SERVICE

**INNOVATION 2023** THE NEW TISCHER BATHROOM

TISCHER is setting new standards with the bathroom's structural, functional and aesthetic design. However, this does not mean that solutions do not have even further potential for perfection. The new bathroom concept from TISCHER demonstrates this succinctly. NEW

# TISCHER NEWS

#### **NEVER STOP DISCOVERING** A SHORT INTERVIEW WITH PATRICK SAUER

## *Mr.* Sauer, the new concept for the washroom plays a pivotal role as an innovation in 2023. What specifically was improved?

We have massively increased the usable space through the new bathroom door guide. For this a new shower tray was developed with an integrated guide for the shower door and an optimized drain. This enables using the space as an extension for the living area when the bathroom is not in use by sliding the bathroom door in front of the toilet, blocking it from sight completely. We have also improved our folding washbasin while maintaining the convenient size. A new drainage system further enhances the comfort of using the washbasin.

## How will the new bathroom benefit campers in their everyday camping life?

They have more space, even in the living room when not using the bathroom. The larger entrance allows the customer to enter the bathroom even more comfortably.

#### How did the idea to redesign the bathroom concept come about?

We wanted to use the available space even more effectively and create added value for the customer. After introducing the new alcove shape last year, we turned our attention to the interior this year.

## The name TISCHER stands for the clear will to innovate. Are there any other projects you can briefly touch on?

The main focus in the future will be on optimizing the cabin weight so that our cabins will also be ready for the impending electrification of pick-ups. Weight will play an even bigger role in future.

# Die Alternative

#### **TISCHER CHRONICLE**

THE HISTORY OF OUR SUCCESS

#### 1973 First self-constructed cabin on a VW pick-up

- 1978 Move into the new plant in Wiebelbach
- **1980** Brands such as Ford, Mercedes, Mitsubishi and Toyota expand the range of basis vehicles
- **1982** Establishment of Tischer GmbH Freizeitfahrzeuge
- 1986 The Nissan pick-up becomes the primary basis vehicle
- 1990 Peter Tischer takes over the management of the company
- 1990 The TRAIL model series is launched
- **2001** The product range is expanded with the addition of the BOX model series
- 2013 Jubilee! We celebrate 40 years of TISCHER Freizeitfahrzeuge
- 2013 The erection and conversion of the company headquarters in Kreuzwertheim is completed
- 2014 The 4,000th TISCHER cabin leaves the plant
- 2015 By now, 178 TISCHER cabins are produced annually
- **2016** Award for TISCHER! The model 260S was distinguished as "The Perfect Camper 2016" by Reisemobilist magazine.
- **2017** A further award for TISCHER: Our models TRAIL and BOX receive the "Seal of cabin quality 2017 for sturdy superstructure construction".
- **2018** Expansion of plant and increased capacity through the construction of a new production hall
- 2021 Plant expansion: Construction of a new hall for initial assembly and vehicle conversions
- **2022** Generation change: Patrick Sauer will take over the management of the company from his stepfather Peter Tischer
- 2023 TISCHER is celebrating 50 years in business and is well positioned for the future

#### **FRIENDS MEET FRIENDS** THE ANNUAL TISCHER TREFF

**Once a year we invite our customers to a get-together.** We meet up every year in a different place; the main emphasis is on fun and a chance to swap experiences. Time and again, the enormous resonance confirms the longstanding bond between us as the manufacturers of demountable cabins and our customers.

Thanks to our long years of experience extending five decades, we as a family company continue to ensure flexible travel, individual mobility and independent freedom.

Whether active holidays, relaxing as a couple, a family trip or luxury camping: Our customers enjoy the wide range of possibilities with the ingenious yet simple pick-up idea.

# TISCHER SERVICE

#### **SERVICE & ACCESSORIES** EXTRAS IN BRAND QUALITY

The tonneau of your pick-ups deserves that extra something. We provide the cover and the coating.

#### TONNEAU COVER BAKFLIP

The optically appealing cover, made of aluminium, with integrated water drain, is extremely sturdy, can be used either completely or partially open when driving and adapts totally to the interior contours of the truck bed. As soon as the panels are closed, the BAKFLIP locks automatically. The cover is attached to the brackets with just two screws – this can be done without difficulty even where edge guards are in place.

The cover has a bearing load of up to 150 kg. The hinges are made of EPDM (ethylene-propylene-diene-monomer), a synthetic rubber which is corrosion-resistant, climate resistant and insensitive to acids. Thanks to the weatherproof material, the tonneau cover resists moisture, heat and frost. In addition, with the locked Bakflip and closed back flap, everything is safely stored to prevent theft.

#### **RHINO LININGS® FOR FLATBEDS**

For every TISCHER cabin we recommend the spray-on two-component plastic coating "Rhino Linings" for flatbeds and truck beds. In addition to outstanding non-slip properties and sound insulation, "Rhino Linings" coatings offer a permanently attractive appearance. The water and air permeable material is an outstanding alternative to conventional, loose truck bed lining and has been in use in the USA for lining truck beds since 1988.

47

**SERVICE & GUARANTEE** ALL-ROUND CARE AND SUPPORT

Thank to our all-round customer care, you get not only our custom-made demountable cabins, but also a comprehensive range of services. When we hand over your new TISCHER cabin, you also receive a comprehensive book containing our operating instructions and all the operating instructions for the technical appliances and equipment installed. This allows you to do your own troubleshooting. And should something require replacement, we procure and dispatch individual and replacement parts, as a rule within one working day. We have many of them in stock on site.

#### **TAKING YOUR HOBBY ALONG** (IN-) SEPARABLE TRAVEL COMPANION

STATISTICS.

MSP® PT 91

1.4.5

RATIN

Holidays and relaxation often also involve action and fun. These include the very individual leisure time activities enthusiasts don't want to forgo on their travels. Be they racing cyclists, water sports fans or bikers: Hobby equipment can always be taken along.

# IDEA

# **LEISURE TIME & MORE**

#### SIMPLY FLEXIBLE - FLEXIBLY SIMPLE

The compact dimensions of our pick-up and demountable cabins simplify travelling with a trailer and provide you with unimaginable flexibility on holiday.

Meter-long combinations that turn winding roads into a test of courage, and multiple attempts to fit into a parking space become things of the past with TISCHER demountable cabins. Horse box, boats or motorbike trailers can be towed with different basis vehicles in combination with various cabin and tow bar types. Alterations to the drawbar (stabilizing wheel) may be necessary. A trailer bracket extension (Harbeck system) is possible with a restricted tow load of max. 1,700 kg.

#### E-BIKE, MOUNTAIN BIKE, RACING BIKE ....

Transporting bikes is really easy with our demountable cabins: with a bike rack directly at the rear, the bike simply comes along too. Depending on the entrance, the bike rack is attached to our pick-up models as either a fixed or a fold-away version. So on your travels you can get close to nature on two wheels and enjoy your hobby to your heart's content.

Travel in comfort and yet remain completely flexible: No matter what hobby you want to take along, we will find the right individual solution for you and your four-wheel vehicle! Have a word with us. We would be pleased to advise you on possible combinations and trailer loads.

## **TISCHER INDIVIDUAL**

SCHER

TRAIL 340S, fixed structure on VW T5 chassis

**BOX 2605,** on Nissan Navara, platform flatbed with fold-down, detachable tailboards

#### **DREAM COMBINATION** INDIVIDUAL VEHICLES & AND SPECIAL PRODUCTS

If you have special requests, have a word with us! Whether basis vehicle, cabin equipment, paintwork, size or material – with our experience and know-how, we can make your dreams of the perfect vehicle come true.

TISCHER cabins can also be used on many further vehicles. This list is valid for Germany only. For other countries, please contact the respective dealer directly.

#### CABIN CONSTRUCTION

Modern sandwich construction technique with accessible roof

Stove-enamelled, smooth aluminium outer membrane with design options in a variety of colours

Poplar plywood interior panelling and 30 mm solid foam insulation

Thermal bridge-free "SEITZ" double-glazed windows, mosquito net and blackout blind

Entrance door with safety lock, window incl. mosquito blind

Double-shell roof cover incl. mosquito net and blackout

Crank supports with plastic washers

#### ALCOVE

Anti-thermal-bridge "SEITZ" double-glazed windows, mosquito net and blackout blind

Bed with comfortable "Froli Star" sleeping system and warm air supply

#### LIVING AREA

Decorative coating on interior walls and PVC floor covering

Furniture in light poplar plywood with modern, easy-care coating

Kitchen furniture and table with hardwearing surface

Aluminium swivel table

Curtains on the living area windows (various versions possible)

Central seating group in 8 cm thick, high-quality foam upholstery, convertible to a bed

Covers in modern design, zippers for removal

Back-ventilated backrests

Forced ventilation on all storage cabinets

#### KITCHEN

3-flame gas cooker with safety pilot and electrical ignition and "Nirosta" sink with split glass cover plate

"Dometic RM 8405" absorption refrigerator, 901 (12 V / 230 V-gas operation) with AES system and removable freezer compartment

#### WASHROOM (EXCEPT TRAIL/BOX 200)

Large, fold-away wash basin, cassette WC and shower

Mirror, lighting and wall cabinet

Roof cover for ventilation

#### 12 V / 230 V SYSTEM

Energy-saving 12 Volt LED lighting in living area
